ABOUT ME

Product- and UX-oriented designer with a background in full-stack web engineering and a current MSc in User Experience and Service Design at Loughborough University. I enjoy talking to users and stakeholders, turning their stories into structured journey maps, service blueprints, and clear problem definitions that teams can act on. I thrive in cross-functional environments, facilitating alignment between design, product, and engineering, and I am especially interested in using UX and service design as a bridge towards future product ownership and strategy.

EDUCATION

Loughborough University **Sep 2025 - Sep 2026(Expected)**
Master of Science,
Major in User Experience and Service Design

Tamkang University **Sep 2019 - Jun 2023**
Business Administration, Major in Information Management
Overall GPA : 3.765 / 4
Awarded :

- The Phi Tau Phi Scholastic Honor Society of the Republic of China

SKILLS

UX & Service Design: User Interviews, Journey Mapping, Service Blueprint, Research Synthesis

Collaboration: Cross-functional Alignment, Stakeholder Communication, Developer Handoff

Tools & Technical: Figma (Advanced), Miro, HTML/CSS/JavaScript, Agile/Scrum

WORK EXPERIENCES

Full Stack Web Developer - SYSTEX Corporation **Jul 2023 - Sep 2024**

- Collaborated with product managers, designers, and developers to clarify requirements and translate business needs into actionable user stories and technical tasks.
- Facilitated cross-functional discussions to surface constraints, align expectations, and reduce miscommunication during delivery of web applications.
- Implemented and iterated front-end and back-end features in an Agile Scrum environment, focusing on usability, performance, and long-term maintainability.

Web Developer Intern - SYSTEX Corporation **Aug 2022 - Jun 2023**

- Supported the development of both front-end interfaces and back-end services for enterprise web projects.
- Identified communication gaps between team members during project delivery and raised questions early to clarify expectations and reduce rework.
- Documented learnings and shared knowledge with teammates to improve handover quality and overall team efficiency.

EXTRACURRICULAR EXPERIENCE

2026 - Grand Challenge Event - Ford Philanthropy

2022 - NVIDIA Jetson AI Deep Learning course - NVIDIA DLI

2021- Red Hat System Administration II Training Certificate(RH134) - RedHat

Red Hat System Administration I Training Certificate(RH124) - RedHat

HONOR AND CERTIFICATE

2025 - UXathon25 Best Client Relationship - Loughborough Uni X Unicorn Factory

2023 - ISO 27001-2022 - British Standards Institution

2022 - Microsoft Excel 2019 Expert - Microsoft Office Specialist

2021 - International Supervisory Management Certificate - City & Guides

SELECTED PROJECTS

UX and service design projects completed during my MSc at Loughborough University.

Nottingham Adult Social Care “Front Door” – Service Design Project

Loughborough University · 2026

- Mapped the end-to-end “front door” journey of adult social care, consolidating insights from staff interviews, on-site observations, and desk research into a shared service blueprint.
- Facilitated discussions with stakeholders from different departments to surface misaligned assumptions, clarify pain points, and align on priority areas for improvement.
- Defined a clearer problem statement and opportunity areas, and co-created initial service concepts to support more accessible, consistent, and user-centred access to adult social care services.

Industry Collaboration Project – UX / Service Design

Loughborough University · 2026

- Conducted user and stakeholder interviews to understand current behaviours, needs, and constraints around the client’s service.
- Synthesised findings into journey maps and opportunity areas, then collaborated with teammates and the client to refine the problem framing and agree on a realistic design direction.
- Contributed to UX flows and prototypes, ensuring that proposed solutions balanced user value, technical feasibility, and business constraints.

Personal UX App Concept – Individual Project

Loughborough University · 2025

- Led an end-to-end UX process from problem discovery and user interviews to ideation, wireframing, and high-fidelity prototyping in Figma.
- Defined key user flows and interaction patterns, and prepared usability test scenarios to validate core assumptions.

Hackathon – 1-day Collaborative Design Sprint

Loughborough University X Unicorn Factory · 2025

- Collaborated with a cross-functional team to rapidly frame a problem, generate ideas, and deliver a clickable prototype within 24 hours.
- Focused on facilitating quick alignment, documenting decisions, and ensuring the final concept clearly addressed the agreed user need.
